

Vedic Astrology and Predictions

I practise Vedic Astrology using methods of Hindu & KP astrology apart from Western astrology. There are some events in life that you have no control over while there are some others, you can influence by your thoughts and actions.

I can predict the inevitable with accuracy and also determine good and not so good trends for Love, Romance, Sex, Marriage, Children, Money, Property, Career, curses, Health and anything else you can think of so you know about the smooth and rough patches that are around the corner. .
